1. 特调加重一体式钢丝连体沉水铅笔无论是在深水区或强水流中作钓都表现非常出色。钓手可以使用PE4-6等重型装备进行长距离大面积搜索，尤其是针对洄游鱼种低活性时，更好的将饵送到水中深层目标鱼藏身处。
2. 饵体通过在中深层缓沉姿态，适合接近白天或低活性时目标鱼隐藏在较深的水深范围内。头部调小浮力后展现了更好的精确下落作用，钓手可以使用缓慢柔和的控饵动作来吸引活性不高的大型目标鱼种。

1. The heavy weighted stainless steel through wire sinking stickbait is excellent both in terms of fishing in deeper waters and strong currents. The weight will also allow anglers to use heavy gear such as PE4-6 and still achieve great distance to cover ground and get the lure into the strike zone of predators.
2. The bait uses slow actions to approach low-activity periods when the fish hidden in the deep range during the day. The buoyancy particular to the plug, which is not found in jigs, works well making it possible for anglers to make slow actions to attract inactive feeders.

2. 在直线匀收时，饵体拥有宽泛的大幅尾部摆动，另外钓手在做抽停时，饵体又具有犀利的逃窜加颤沉动作，甚至当海面出现鱼群炸水时，又可以通过竿尖快速上挑动作使饵具有浮水铅笔在水面的窜动姿态。

[NOEBY TECHNOLOGY]

POLYHEDRON DIAMOND CUBE

The Polyhedron DIAMOND CUBE was specifically designed to capture the feeling of being inside a crystal. It polyhedron sends out flashes of reflected light and insert the reflection core of the crash pattern which fish can see from a great distance. This must be one incredibly surreal and glittering spectacle to witness in person.

REINFORCED FISH BONE FRAMEWORK

Designed for big game lures. We reinforcing the body side with fish bone rib creates an internal framework to strengthen the body of the lure, making it far less likely to be crushed or cracked by large predators.

REINFORCED HEAVY-DUTY ABS CONSTRUCTION

Normal plastic was simply not strong enough for our lures, so we designed a special formula of High Density ABS plastic and is ultimately stronger than any other plastic used for lure production.

ONE PIECE SOLID STAINLESS STEEL PLATE-THROUGH CONSTRUCTION

Cut immediately from imported ultra rust-proof and strong stainless steel plates for a strong complete whole piece structure without joints or openings. Dozens of times stronger than that of the conventional steel wire and the actual tested pulling tension reaches over 200kg.

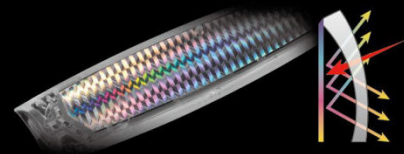

UV

Some of our lures are UV reactant and it reactant does not affect the normal appearance of the lures.

THROUGH-WIRE CONSTRUCTION

Through wire construction uses a solid piece of heavy wire that runs from the nose of the lure, through to the tail hook for extra strength and durability.

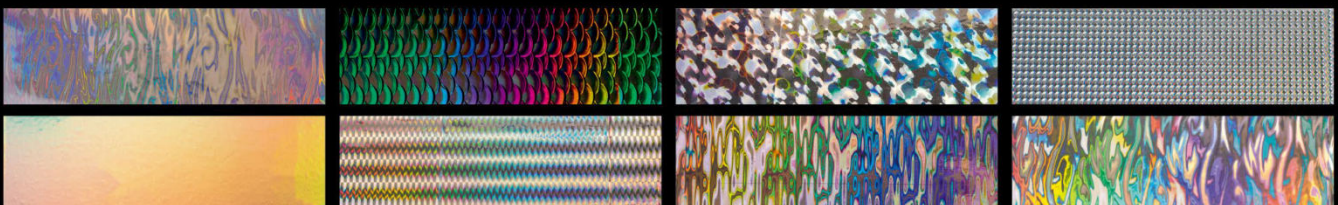

INTERNAL HOLOGRAPHIC FOIL

A hologram sheet is built in the body, it continues to shine no matter how much it is scratched. Most predators use sight as their primary hunting sense. Making sure you are using the most attractive lure will enhance your chances of a strike.

REMARKABLE REALISTIC PATTERNS FOIL

Most predators have exceptional sight and using lures that are as life-like as possible, with realistic patterns, can give you an advantage when compared to using a lure with a smooth painted finish.

作为缓沉型淡水通用远投铅笔，当钓手慢速且线性匀收时，这种拥有平切头部设计的饵体会发生非常蜿蜒而精致的“S”型游动，非常适合在大水域下搜索作钓，如果短频快抽竿时，饵体会不断左右转向前进，模拟左右逃窜的小鱼，适合在港口、河流和河口等浅水区域作钓海鲈和其他中大型掠食者。

Item	Length	Weight	Hook	Type
NBL1956	90mm	24.5g	#4	缓沉 Slow Sinking
NBL1956	140mm	75g	2/0	缓沉 Slow Sinking

This slow-sinking lure has a very sinuous and delicate "S" swim when retrieved in a slow and linear manner, ideal in situations of apathetic fish; while if retrieved quickly with jerks of the rod it will swerve, simulating a small fish on the run, suitable for use in shallow water areas such as ports, rivers and mouths in search of sea bass and coastal predators.

NBL 1955

1. 非常适合远投的一款流线型沉水铅笔，饵体两头收紧的设计，即使遇到逆风等天气也能保持优异的远投距离。
2. 平坦的侧轮廓在水中拥有很棒的抓水能力，给钓手带来更清晰的操作回馈感，低重心与平坦腹部设计使饵拥有强烈的颤沉摇摆，搭配匀收时产生的尾部自然摇摆，恐怕没有鱼能抵抗如此有吸引力的饵。

Item	Length	Weight	Hook	Type

1. Shaped for extreme distance casting, almost defying gravity and the flat sided profile for great water grip, fished slowly with occasional twitching, this is a deadly lure.
2. The low centered gravity flat balancer incorporated into its slender body creates a delicate, natural roll action. Allows to rise rapidly to the surface even during dead slow retrieves, create V shaped ripples.

AMATA NEW

NBL 1953

较大的外形轮廓设计与相对平直侧边的独特之处在于支持慢速/高速匀收、间歇抽停等多种手法，操作极易上手。其V型关节设计，能让饵体轻易实现宽幅滑行甚至连续调头回旋等自然饵鱼泳姿。缓沉设计待饵体沉落到水底层时，抬起竿稍提拉，将呈现斜向向上逃窜的姿态，非常容易引起目标鱼的驱逐性攻击。

1. The bigger profile of this swimbait allows this bait to uniquely roll side-to-side as it swims through the water, feature a V-shaped joint, which creates a wide gliding action, accurately mimicking the natural movement of a baitfish.

SLOW PITCH JIGGING 独节慢摇竿 NEW

独节设计竿身以东丽最新高强度、高弹性高密度纳米树脂碳布打造，不仅大幅提升强度和弹性，还有效减轻重量，赋予Voyager系列慢摇铁板竿超强韧性和细腻手感。

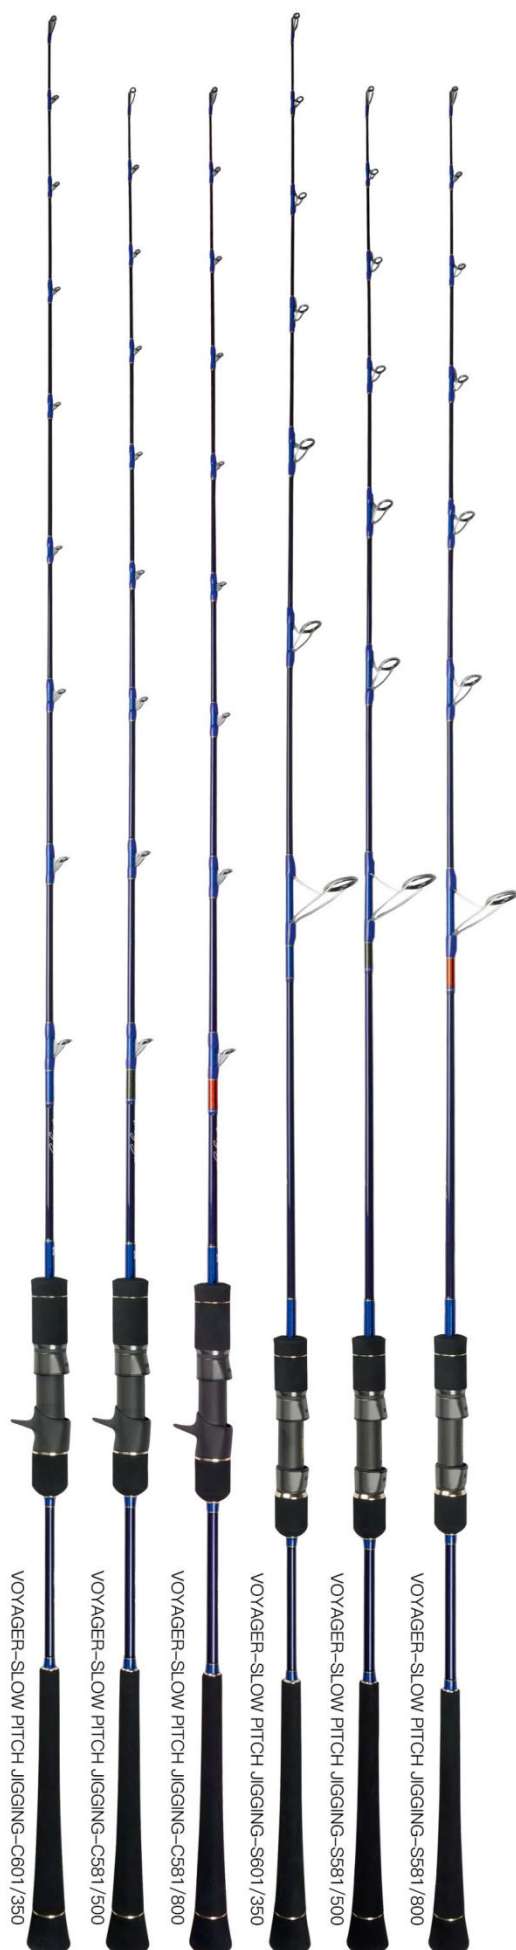

针对深水及复杂双流等特殊环境，竿体具备强劲的张力与扭矩，在高压下也能轻松操控350至800g的铁板，表现出色。适配多种速度和节奏的抽竿操作，丝滑的力量过渡弯曲曲线在对鱼施加持续高压的同时有效减轻钓手负担，支持钓手使用肚顶保持大角度弓鱼。

This is a special jigging series that attracts fish with a variety of speeds and pitches of jerking, and the beautiful bending curve of the one piece blank allows anglers to maintain the high stick position which will continuously apply high pressure on the fish while reducing the load on the angler side.

It is ideal for slow pitch jerk, one pitch jerk and other jerking patterns focusing on the sinking action of the heavy weight jigs. Anglers can also utilize the fighting belt to jerk or set the grip end under your armpits.

To comfortably manipulate 350 to 800g jigs under special conditions such as deep waters, tidal currents, and complex double tides, the blank has strong tension and torque, even in high water pressure.

BIG GAME - TROLLING 拖钓竿

潇客Big Game系列满足您对深海重型作钓大型鱼种的所有要求。它具有耐用、高品质的配置，坚固且具有弹性，将鱼施加的过量压力主要转移到杆体上，而不是钓手身上。更少的扭矩和挣扎反弹意味着更多的钓鱼乐趣和更少的疲劳。

竿体搭配的是目前诺比最高品质的玻璃纤维材质。

X-Wrapping结构由多层交叉编织组成，这些技术以相反方向对角线紧紧地缠绕竿坯，从而在与鱼搏斗时，在不增加额外重量压力的情况下增强扭转刚性。

The Leisure Big Game Series is everything that you could ask for in a fishing rod. It has durable, high-quality components, it's sturdy yet has resilience so the main struggle gets transferred to the rod instead of you. Less torque and struggle to you mean more fishing enjoyment and less fatigue. These blanks are using the highest quality glass fiber available. This is what differentiates us from other rod makers.

X-Wrapping construction consists of multiple layers of tape that tightly wind the blank diagonally in opposite directions, resulting in enhanced torsional rigidity without adding extra weight.

潇客Big Game系列以在最严苛的深海环境下顺利作钓而设计初衷，可应对最重型的拖钓方法。加强重型玻璃纤维大大增强了杆的强度，同时保留了竿体适当的弯曲能力。这种技术的组合提高了钓竿的结构刚度，使其在负载下保持真实扭矩状态，同时使钓鱼者能够通过导环有效地传输拉力，从而在重型海上钓法中提供及时的战斗力。

配备了全套滚轮导轨和顶环，可随时对抗海洋中最强大的鱼类，包括蓝鳍金枪鱼，旗鱼等。每个型号都采用不同的导环布局、长度、硬度等，为钓鱼者提供更多选择，以满足他们的喜好和作钓风格。

Engineered to perform in the most demanding of circumstances, the Leisure Big Game Series Conventional Rods are equipped to dominate the heaviest trolling applications. Heavy-Duty glass fiber greatly enhances rod strength while retaining the ability to flex. This combination of rod technologies increases the structural rigidity of the rods so that they remain true under load while enabling anglers to efficiently transfer power through the blank for much needed fighting power in heavy offshore applications.

Equipped with a full set of roller guides and tip, the rods are ready to take on some of the most powerful game fish in the sea, including the mighty Bluefin Tuna.

Each model utilizes different guide layouts, lengths, power and more, delivering more options for anglers to meet their preferences and fishing styles.

VOYAGER OFFSHORE CASTING 竞技波爬竿

自2022年起，无数次的碳布搭配选择、设计优化、拉力测试以及实战循环测试，我们终于实现了突破。灵敏且灵活的竿梢让抛投和操控假饵得心应手。

鱼竿素材的制作涉及多种因素，包括碳布的弹性、厚度、树脂含量、纤维角度以及模具锥度设计，每一项都决定着最终产品的表现。在无穷无尽的组合中，我们找到最优方案，成功打造出具有卓越重载耐久性的钓竿。通过优化的搭配，钓手使用肚顶下高达70度的高角度抬升时，竿腰会展现出柔韧且流畅的力量过渡，同时利用中腰和后腰的回弹力有效对抗巨物，大幅减轻作钓时的负担，为钓手提供更加舒适、高效的使用体验。

Mankind is ever eager, ever evolving, and ever inventing.

We aspired to create a rod capable of going head-to-head with some giants in casting game, the rod blank must be absolutely trustworthy. After countless years of testing in the field, this ambition led to the inception of Voyager boat casting series.

The Voyager Boat Casting series are the lightest in weight, highly well balanced, possess a light casting feel and armed with outstanding butt power to win over the massive fish. All models are unique from each other, it have been loaded sensitive and flexible tip section to manipulate lure at your will, potential of usability and ability of distance cast.

Innovative Blank Development Story

If the rod blank is overly rigid, it becomes too challenging for anglers to endure the fierce struggle of a monster.

Additionally, such a stiff rod blank wouldn't allow casting a 100g lure.

On the other hand, a rod blank that's too flexible wouldn't just fail to lift a monster but would also easily break under the heavy load.

Our journey towards creating the perfect rod blank involved relentless cycles of design, bench testing, and field testing, and was finally completed in 2024.

We precisely design the necessary torque and power, fulfilling the requirements for recoil, durability, and flexibility needed for our blank.

Its core flexibility allows the rod to be bent effectively with realistic human strength, generating repulsive power as it bends. Even in a fight with monsters, the rod blank remains robust, assisting anglers by lifting while enduring the strain.

PLUGGING SPECIAL 综合波爬竿 NEW

一款综合性能优异的波爬竿，重量更轻、抛投更远、强调针对各种钓法的相对泛用性，无论是浮水/沉水铅笔、波爬等都能展现出良好的操控性，出色的竿腰力量带来的高回弹高响应，为了了钓手可以通过竿体本身的回弹力将目标鱼拉到水面。

Our mission was to create a boat casting rod that is lighter, casts farther, is stronger, and offers the ability to use a wide range of lures while being highly efficient when going head-to-head with monstrous species.

We focused on its casting ability as the most important aspect which is obviously the key factor when venturing out for a casting game. As the Voyager Plugging Special series are equipped with a highly resilient and highly responsive blank for extended castability, this will also assist anglers automatically and directly apply pressure on the fish during the fight.It is a user-friendly rod as anglers can smoothly shift from the loading of the blank to aggressively lifting of the fish.

INSHORE 近海全能竿

专为近海路亚设计的综合强力款式，无论是船钓、岸抛还是皮划艇，都可以通过搭配不同钓组在不同海况下对抗目标鱼。

竿身设定具有很浓的美系风格，普通路亚竿强调过硬的竿腰会使钓手长时间水下拔鱼控鱼的过程中手腕非常疲劳，Virtuosi inshore强调力量传导过渡设计，历时两年的不断设计和测试，竿梢调教相对软弹，因此路亚饵在水下的泳姿明显更自然飘逸，最后逐渐过渡到强有力的竿腰及手把。目标鱼对抗的力量越大，竿身弧线越漂亮，充分利用每一寸竿身，大鱼的冲击力会逐级向后释放到手把节，以至钓手可以通过加长设计的手把运用小臂或大臂的力量来对抗。

支持各种饵型、控饵泳姿好、刺鱼发力透彻、对抗过程力量分散舒适、竿身皮实拉力大，这才是一款好近海综合竿需要具备的所有要素。

Virtuosi Inshore Series Rods will have you fishing with ease and power.

It has been in the design and test field for over 2 years and can handle a very wide range of coastal fish and fishing techniques.

Expect high performance whether you are fishing from a boat, or a kayak, fishing off of the beach to offshore fishing.

Versatility for Various Inshore Species

- The ergonomic handle ensures a comfortable and firm grip, even during prolonged fishing sessions.
- All rods feature an extended fore grip handle, which is a much-desired addition for any experienced inshore angler.

* The MH / H power model features a rubber gimbal that securely fits into a rod holder or a fighting belt for additional support.

*S: Solid Tip

	Trout (main stream,lake)	76L 76ML 83ML	If you're targeting trout up to 30cm in the main stream, 76L is recommended and if you're targeting larger fish, 76ML is recommended. For using small lures in lakes, 76L is recommended, and for long casting, the longer 83ML is ideal.
	Horse mackerel	68L-S 74UL-S	For beginners in jighead rigging, 68L-S is recommended. If long casting is required, 74UL-S is a match.
	Rockfish	74UL-S 76L	For Rock fishing with a combination of winding, a longer rod is advantageous. For worm fishing, 74UL-S is the best match. For plugs, 76L is a match.
	Seabream	76L	For exploring the bottom delicately and using topwater plugs for black sea bream, the shorter and more flexible 76L is a match.
	Seabass	86ML 90ML 90M 96M	For harbor areas, choose 86ML as the main focus, and for river mouths, choose 90-96M as the main focus. If you mainly use minnows and sinking pencils, ML is recommended and if you use heavy vibrations frequently, M power is recommended.
	Eging	83ML 86ML 86M	For the fall squid season, 83ML or 86ML is recommended. For the spring large-size season, the 86M which can also cast large Egi is the best match. Even around the fishing port, you can easily target up to 30cm.
	Scorpion fish & Pheasant grouper	76ML 86M	Even around the fishing port, you can easily target up to 30cm. For Scorpion fish, 76ML is recommended and for strong-pulling pheasant grouper, use 86M.
	Hairtail	83ML 86ML 86M	The key to winding is to keep the lure moving. Use 86ML as the main focus and if you lack confidence in your arm strength, use 83ML. When blue fish are mixed in, 86M is recommended.
	Flounder & Flathead	90ML 90M 96M	Long models with excellent long casting are ideal. For minnows and worms, 96ML is recommended and for metal jigs, 96M is ideal.
